Maharashtra: Amit Shah offers prayers at Sai Baba temple in Shirdi

05 Oct 2025 | 1 min read

**Madhya Pradesh Chief Minister Mohan Yadav announced that the state is set to benefit significantly from the Ken-Betwa river linking project. This groundbreaking initiative will bring substantial advantages to farmers in Raisen and Vidisha districts.**

Speaking at a public event, MP CM Yadav said, "...When our government was formed with your (Defence Minister Rajnath Singh) and Modi ji's blessings, we were working in all areas... Now, a big benefit is going to be received from the Ken-Betwa river linking project; this is the world's first river linking scheme, in which farmers of Raisen district and Vidisha district will also get benefit..."

This project, the world's first river linking scheme, aims to harness the water resources of the Ken and Betwa rivers, providing much-needed irrigation support to the region's agricultural sector. The project involves transferring surplus water from one river basin to another, ensuring optimal utilisation of water resources.

The project will ensure a steady water supply, enabling farmers to cultivate their land more effectively and increase crop yields.

By providing reliable irrigation, the project is expected to boost agricultural productivity and contribute to the region's economic growth.

The Ken-Betwa river linking project will help manage water resources more efficiently, reducing the impact of droughts and floods in the region.
